

PRITIRANJAN MOHANTY

+91 9348481019 | pritiranj.mohanty2003@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

- **B. Tech, Computer Science & Engineering** — Trident Academy of Technology | CGPA: 8.77 | 2020–2024
- **Intermediate, Science** — Maharishi College of Natural Law, Bhubaneswar | 71% | 2018–2020
- **Matriculation** — Narayani Bidyapitha, Puri | 67.83% | 2017–2018

TECHNICAL SKILLS

- **Programming Languages:** Java (8+), JavaScript, C
- **Frontend:** HTML, CSS, React, Tailwind CSS
- **Backend:** Spring, Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate, Spring AOP, RESTful APIs, Microservices, J2EE (JDBC, JSP, Servlets), AWS(EC2, EB, S3, IAM)
- **Databases:** MySQL, Oracle SQL, PostgreSQL
- **Tools:** Git, Docker, GitHub, Swagger, Lombok, Apache Tomcat, Jira, Confluence, Eclipse, IntelliJ IDEA, VS Code, Android Studio, Postman, Playwright, Appium, TestNG, JMeter.

INTERNSHIP

iServeU Technology Pvt Ltd, *Bhubaneswar*

June 2024 - October 2024

QA Intern

- Executed 500+ manual test cases including functional, regression, and UI testing to ensure product stability.
- Performed backend API validation using Postman, ensuring 99% API reliability across diverse modules.
- Implemented Playwright-based API automation, integrated with Allure reports detailed analysis and debugging.
- Conducted end-to-end(E2E) testing of application flows to ensure business logic correctness and system integrity.

PROJECTS

Billing System | [GitHub](#) | [Demo](#)

- Developed a full-stack Billing System for small businesses to manage items, categories, customers, orders, and payments through a single unified web application.
- Implemented Role-Based Access Control allowing Admins to manage the entire system — users, inventory, and reports — while restricting regular Users to only creating bills and collecting payments.
- Built a complete order and billing workflow where items can be added to a cart, orders are placed and persisted, and payments are collected online through Razorpay with secure server-side verification.
- Enabled item image uploads via AWS S3 and provided a real-time dashboard with key business metrics such as total orders, revenue, and customer data.

Tech Stack: React, Vite, Spring Boot, Spring Security, JWT, MySQL, Razorpay, AWS S3

Global Weather Service | [GitHub](#) | [Live](#)

- Built a subscription-based Weather Reporting System where clients can register and subscribe to GO, PRO, or MAX plans to receive automated daily weather reports tailored to their plan tier.
- Automated weather report delivery using scheduled Cron jobs — GO and PRO subscribers receive a morning report at 6 AM, while MAX subscribers additionally receive an evening report at 6 PM, with reports delivered as formatted PDF attachments via email.
- Enabled Admin to manage and update weather data through the platform, which is then used to generate and dispatch reports to all active subscribers without any manual intervention.

Tech Stack: Spring Boot, Spring Scheduler, Spring Security, JWT, OpenPDF, JavaMailSender, MySQL, JavaScript

Student Management System | [GitHub](#) | [Demo](#)

- Built a web application for educational institutions to manage student records, where authorized users can create, search, update, and delete students through a role-specific dashboard interface.
- Implemented three-tier Role-Based Access Control — Super Admin has full system access, Admin can perform all CRUD operations on student records, and HR is restricted to only viewing and updating existing students.
- Enforced secure login with session-based authentication, ensuring each user can only access pages and actions permitted by their assigned role, with unauthorized access automatically blocked.

Tech Stack: Java, Servlet & JSP, Hibernate, JPA, MySQL, Bootstrap

COURSE

- **Java Full Stack Development- JSpider Institute, Bhubaneswar**

Mar 2025 - Dec 2025
